

6516206368.txt

I benefit from listening to XM Satellite Radio and its traffic and weather channels.

Please let the freedoms this country stands for be. Do not cave to this or any others attempts to limit my access to information from any avenue. I should have the freedom to choose where and when I get information, and providers should be able to build a better mouse trap. Older technologies need to accept change. It is not your job to artificially prop up the weak performers. Let the free market function unhindered.

Ian Eddy
